

# EARTHCRAFT BIOSYSTEMS™

- Blend of cold processed Quillaja saponaria and Yucca schidigera extracts
- Steroidal saponins create microscopic portals in cell membranes, allowing water and nutrients to pass more easily into plant cells
- Contains surfactants able to make water "wetter" by breaking surface tension
- Allows water to penetrate compact soils for more even and thorough saturation
- Provides better spread, coverage, and sticking of foliar applications
- Breaks up excess salts and minerals and flushes buildup from soil and irrigation systems
- Increases seed germination rate and seedling survival rate, as well as reduces transplant shock
- High brix formulation promotes overall vitality while feeding beneficial soil microbes
- Promotes resistance to environmental stresses allowing plants to thrive in harsh conditions
- Increases effectiveness of fertilizers leading to reduced applications

## REGENERATOR™

Regenerator is a highly effective blend of Quillaja saponaria and Yucca schidigera extracts. This is an organic soil conditioner, surfactant/wetting agent, emulsifier/adjunct, flushing agent, biostimulant and stress/shock reducer. Use Regenerator to bring vitality to your garden and see your plants thrive like never before!

Available sizes: 1 pt , 1 qt , 1 gal , 2.5 gal , 5 gal , 55 gal , 265 gal
