TERRESTRIAL™ O-O-O.45

EARTHCRAFT BIOSYSTEMS™

TERRESTRIAL™ O-O-O.45

Terrestrial is a powerful organic fulvic acid formula derived from ancient peat deposits. This nutrient catalyst and plant energizer can improve photosynthesis, increase root mass, increase plant metabolism, stimulate soil microorganisms, and improve plant respiration by increasing oxygen absorbed by roots. Due to a high cation exchange capacity, nutrients are bound to these microscopic acids for more direct and immediate uptake. Use Terrestrial in all phases of growth for a hardier, more vibrant, and more productive garden!

O-O-O.45

Guaranteed Analysis

Soluble Potash(K2O)-----O.45%

Derived from: peat

ALSO CONTAINS NON PLANT FOOD INGREDIENT:

15% Fulvic Acids from peat

Purpose: May enhance nutrient uptake

Application Rate:

Root Drench: 4-8 ml per gallon of water with every feeding or once or twice per week

Foliar Application: 4-8 ml per gallon of water once or twice per week

Keep out of reach of children and pets. Do not inhale or ingest. Wash hands after use.

1 GAL / 3.8 L / NET WT 8.8LBS

MEETS THE NATIONAL ORGANIC PROGRAM REQUIREMENTS FOR ORGANIC CROP PRODUCTION
